---

**We provide Master Equipment List Development Support Services both remotely and on-site to:**

- Develop Equipment Hierarchy
- Collect Equipment Nameplate Data
- Verify Equipment Locations
- Update Plant Drawings
- Populate Equipment Databases
  - Maximo
  - SAP
  - Oracle
- Develop PI Hierarchy

## Why us?

Our team of highly experienced professionals work with your organization to taylor your Master Equipment List and database to meet your goals. We can help you with your criticality ranking of equipment so that you can focus your resources to achieve the biggest bag for your buck! Some of the more critical components that we typically are:

<ul style="list-style-type: none"><li>• Motors</li><li>• VFD's</li><li>• Pumps</li><li>• Gearboxes</li><li>• Chillers</li><li>• Compressors</li></ul>	<ul style="list-style-type: none"><li>• Conveyors</li><li>• Mixers</li><li>• Fans</li><li>• Cooling Towers</li><li>• Air Handlers</li></ul>
---	---

## Our Process

Before you can begin your monitoring journey our team will meet with you to determine your goals, needs and priorities. We will work with you to develop a plan of attack that suits your budget, ROI requirements and timeframe. A typical plan includes the following steps

- ⇒ Review and/or Develop an Equipment Prioritization
- ⇒ Database Hierarchy Review or Development
- ⇒ IT Integration - Data Mapping (PI, Maximo, Oracle, etc.) as required
- ⇒ Work Process Integration
