---

**We provide Monitoring, Consulting, Installation and Support Services for many types of equipment such as:**

- Data Center Cooling System Components
- Power Generation Equipment
- Oil & Gas Transmission Components
- Power Transmission & Distribution Components
- Solar Plant Inverters

## Why us?

Our team of highly experienced professionals work with your organization to taylor the Equipment Monitoring system to meet your ROI and Reliability goals. We also provide monitoring of your equipment remotely and will let you know when you have an issues that need to be addressed. Critical components that we typically monitor include:

• Motors	• Conveyors
• VFD's	• Mixers
• Pumps	• Fans
• Gearboxes	• Cooling Towers
• Chillers	• Air Handlers
• Compressors	

## Our Process

Before you can begin your monitoring journey our team will meet with you to determine your goals, needs and priorities. We will work with you to develop a plan of attack that suits your budget, ROI requirements and timeframe. A typical plan includes the following steps

- ⇒ Equipment Prioritization
- ⇒ Sensor Identification GAP Analysis
- ⇒ Sensor Specification & Installation
- ⇒ IT Integration - Data Mapping (PI, Maximo, Oracle, etc.) as required
- ⇒ On-Line Monitoring Services
- ⇒ Work Process Integration
