---

**We provide Equipment Tagging Services to all Industries and include both remotely and on-site support services to:**

- Develop Equipment Hierarchy
- Collect Equipment Nameplate Data
- Verify Equipment Locations
- Update Plant Drawings
- Populate Equipment Databases (i.e. Maximo, SAP, Oracle)
- Design Physical Tags
- Tag Installation

## **Why us?**

Our team of highly experienced professionals work with your organization to tailor your Master Equipment List and database to meet your goals. We can help you with your criticality ranking of equipment so that you can focus your resources to achieve the biggest bag for your buck! Some of the more critical components that we typically tag include:

- Motors
- VFD's
- Pumps
- Gearboxes
- Chillers
- Compressors
- Conveyors
- Mixers
- Fans
- Cooling Towers
- Air Handlers
- Instrumentation
- Valves and Operators
- Transformers
- Breakers
- Electrical Panels

## **Our Process**

Before you can begin your monitoring journey our team will meet with you to determine your goals, needs and priorities. We will work with you to develop a plan of attack that suits your budget, ROI requirements and timeframe. A typical plan includes the following:

- ⇒ Review and/or Develop a Equipment Prioritization
- ⇒ Database Hierarchy Review or Development
- ⇒ Update CAD Drawings
- ⇒ IT Integration - Data Mapping (PI, Maximo, Oracle, etc.) as required
- ⇒ Work Process Integration
- ⇒ Tag Installation
